The same goes for changing filters: A dirty fuel filter can impair a conventional vehicle's performance, but dirty fuel can clog a diesel's fuel injection system, and you may need expensive professional help to get back on the road again. As a rule, you shouldn't try to clean or adjust a diesel's fuel injectors yourself, but if you maintain your vehicle according to the directions in the owner's manual, they can last 100,000 miles or more.
