From the 19th century the philosophy of science has been shaped by a group of influential figures. Who were they? Why do they matter? This introduction brings to life the most influential thinkers in the philosophy of science, uncovering how the field has developed over the last two hundred years.Taking up the subject from the time when some philosophers began to think of themselves not just ...

Philosophy of Science: The Key Thinkers (Key Thinkers ...

Paradigm shifts and scientific revolutions — a view of science, associated with philosopher Thomas Kuhn, which suggests that the history of science can be divided up into times of normal science (when scientists add to, elaborate on, and work with a central, accepted scientific theory) and briefer periods of revolutionary science. Kuhn asserted that during times of revolutionary science, anomalies refuting the accepted theory have built up to such a point that the old theory is broken down ...

The philosophy of science

CHAPTER 2 History and Philosophy of Science Sonya R. Hardin and Sue Marquis Bishop "The study of paradigms...is what mainly prepares the student for membership in the particular scientific community with which he [she] will later practice (p. 11). In the absence of a paradigm...all the facts that could possibly pertain to the development of...

Philosophy of science | Britannica

The history and philosophy of science is important as a foundation for exploring whether scientific results are actually truth. As nurses our practice should be based upon truth and we need the ability to interpret the results of science. Nursing science provides us with knowledge to describe, explain and predict outcomes.

2. History and philosophy of science | Nurse Key

In its critical role, philosophy aims to criticise the various conceptions of science as well as the various ways to present science, its methods, and its aims. A key object, for instance, of the critical function of philosophy is to disentangle the part of scientific theories that is up to us and the part which is up to the world.
